

FRANCO COSTA UNDER THE SEA

concept and goal

ALDEBARAN

FRANCO COSTA

How to feed and give desalinized water from the sea
to a billion poor people

On June 24th I am planning different meetings and a press conference with Frank Schweikert (frank.schweikert@aldebaran.org, +49 040 3257 210) and ALDEBARAN in Kiel.

I am creating a brand new painting inspired by the deep sea studied and shown by the scientist Frank Schweikert from his boat, Aldebaran. This painting will be shown for the first time at the exhibition taking place at the K.Y.C. (Kieler Yacht Club Hotel, Hindenburgufer, 70 - D -24105, Kiel – tel: 0431-850) but also with a special reproduction on the mainsail of ALDEBARAN, that will be sailing also in Kiel.

We are looking for new sponsors with good will, who share our ideals, and who would like to work with us, in aiming towards the ambitious goal of feeding and giving desalinized water to a billion poor people, trying to satisfy their needs.
